

NFH2000Z Headlamp Instruction Manual

Inserting Batteries into Battery Pack:

- Only use provided rechargeable 18650 Li-ion batteries.
- Only use provided cord for charging.
- Ensure batteries are properly installed in battery pack, improper installation can cause damage to headlamp.

Lighting Modes:

Press the On/Off button to turn on the headlamp. Continue to press the button to cycle through the different lighting modes.

The sequence is as follows:

Low Light - Medium Light - Strong Light - Strobe - SOS - Off
Pressing the On/Off button for more than 1.5 seconds will turn the headlamp off in any mode.

Zoom Function: Pull on headlamp to zoom in - push back to zoom out.

Beam Angle: Adjust your headlamp's beam downward up to 90°

Charging your 2000 Zoom Headlamp

- Use only the provided charging equipment for charging.
- Plug type-C USB chord into side of battery pack and connect to a power source. Batteries get charged right inside the battery pack.
- Recharge batteries as soon as possible once the indicator light shows low power.
- The charging indicator light is red while the batteries are charging and then turns blue once the light is fully charged.
- If this light is not used for a long time, please recharge and discharge it every three months to keep the battery in good condition.

CAUTION:

Do not shine this light directly in eyes as this can cause damage.

BATTERY INSTRUCTIONS

1. It is important to note which end of battery is POSITIVE +.
2. The provided battery is a powerful 18650 Li-ion battery that can cause damage to headlamp and battery if improperly placed in battery pack.
3. Only store battery inside battery pack or a safe 18650 Li-ion container.
4. The 18650 Li-ion battery has no memory and can be charged at any time.
5. DO NOT charge battery unsupervised.

NightRider™ LEADS Inc. is not responsible for the use of these batteries and will not be liable for any damages or injuries resulting from the use of this product. USE AT YOUR OWN RISK.
